**HUNT GROUP**

**INTERNATIONAL ARMS & SECURITY**

**KNT12  
SERIES  
INSTRUCTION MANUAL**

**As a rifle owner, we will state the following safe rifle usage rules. You must comply exactly!**

- Keep your rifle out of reach of children.
  - Keep your rifle and cartridge in separate places.
  - Do not store the rifle fully loaded.
  - After your shot is finished, unload your rifle. Make sure your rifle is unloaded and safe when climbing a tree, jumping over a fence or walking on a slippery surface.
  - Do not load your rifle before you reach the place where you will shoot. NEVER keep your finger on the trigger before you see the target and decide to fire.
  - Never shoot at water, rocks or hard surfaces.
- Regardless of whether your rifle is loaded or unloaded, always make sure that the muzzle of your rifle is pointed in a safe direction.
- When giving your rifle to anyone, make sure that the mechanism is fully open and your rifle is safe and without a cartridge.
  - Always use goggles and headphones while shooting.
  - After using your rifle, be sure to disassemble the barrel, the choke on the barrel, the gas chamber, the piston, the mechanism, and replace them after cleaning and lubricating them.
  - When shooting with your rifle, make sure that the fore-end fixing nut, the barrel fixing nut and the gas chamber fixing nut are tightened. (Don't forget to tighten the connection nuts after disassembling your rifle for cleaning or any other reason)

Otherwise, your rifle will leak gas and the barrel will not be stable, so the operating efficiency will decrease.

**Safety rules are very important for the protection of you and your loved ones. Ignoring the points specified in the instructions for use can cause very serious injuries.**

Keep your operating instructions as long as you use your rifle. If your rifle changes hands, also hand over your operating instructions.

For any lost or missing user manual, please request a free copy from your factory or you can access the information you want from [www.huntgrouparms.com](http://www.huntgrouparms.com)

After cleaning, disassembling or assembling your rifle, please check the functional suitability of the rifle once again before using the cartridge.

Any modification made outside of our factory and improper assembly of parts to your rifle can cause very dangerous errors and as a result, serious damage to the user and the people around!

Correct assembly and operability of the rifle after any disassembly and reassembly is entirely the responsibility of the user.

**NEVER** enter any cartridge filling and use process without fully reading and understanding the information in this user manual.

Before using your rifle, definitely learn the working principles of your rifle, these operations include **"TAKING SAFE POSITION"**, other safety features, opening and closing the mechanism safely, loading and unloading in a safe manner.

White dot, safety is on gun is ready to fire

Red dot safety is off

### IMPORTANT WARNING

- **NEVER RELY ON MECHANICAL SAFETY SYSTEMS.** Like all other mechanical parts, the safety system can also break, malfunction, wear out, deteriorate, fail to function due to faulty assembly or lack of maintenance. Being dependent on the safety system and relying on it completely does not fit the right rifle usage conditions.
- **NO SAFETY SYSTEM** can prevent the accidental discharge of children or those who do not know how to use the rifle, while playing with the rifle, and the consequences they may cause.
- Assume each rifle as "**NO MECHANICAL SAFETY SYSTEM**" and take your precautions according to this criterion.

### MATTERS TO BE CONSIDERED WHEN SHOOTING

Keep your fingers or other objects away from the action area of the bolt and the charging handle while firing, as the mechanism moves back and forth very quickly when firing.

Keep the safety on and keep your fingers outside the trigger guard until you are fully ready to fire and fully aim at your target.

The mechanism remains open when the last cartridge in the magazine is fired. But never rely on it. Always look inside the magazine to make sure there are no cartridges left.

Like all other semi-automatic rifles, the **Hunt Group MH-TS** semi-automatic rifle automatically drives the next cartridge from the magazine into the chamber every time you shoot. Since no mechanical force other than pulling the trigger is required for this process, the rifle is ready for the next shot after each shot.

We unscrew the pressure nut by turning it to the left.

We pull the thrust nut spring forward.

We hold the forend and the barrel together and pull them forward.

We separate the forend from the barrel.

We attach the forend to the barrel.

We hold the forend and the barrel together and attach them to the receiver.

Thread the compression nut spring onto the screw at the end of the forend.

Tighten the compression nut by turning it to the right.

After the process of loading the cartridge directly into the barrel, the mechanism remains open. A cartridge is placed in the chamber in front of the barrel and the side button is pressed.

If we do not want to load cartridges, the charging handle can be brought forward slowly while pressing the button.

## BE COURTEOUS

When shooting or hunting always acquire the permission of the landowner. Respect the land. Do not litter, use gates when possible, leave open and closed gates closed. Drive vehicles only where advance permission has been granted and always express gratitude for use of another person's land.

Offer your labour or game as repayment for the privilege of use. Remember you are helping develop a reputation for all sportsmen/sportswomen.
